REAL-TIME ENERGY PRODUCTS

Take Advantage of Market Forces

- A Real-Time Energy (formerly MCPE) product allows you to buy power at the real-time grid price for your specific zone. Historically cheaper than fixed, RTE is ideal as a bridge product between times of higher prices or for newer meters with limited usage history. RTE prices are based on the 15-minute real-time ERCOT energy clearinghouse. Each one of these 15-minute prices is then multiplied by your usage during each period to determine your overall cost for the month. With natural gas prices at some of the lowest levels in years, the question is not when budget can withstand monthly price fluctuations, your business may benefit from the historically-lower overall prices derived from RTE products. to act, but for how long. Your TriEagle account manager will work with your business to determine how we can help set and improve your energy budget.
- Like our other products, there are no hidden fees, artificial price floors, or additional charges. If your energy

TriEagle is a proud member of the Crius Energy family of brands.

MCPE/RTE PRICES 2008-2016

Chart: RTE spiked in mid-2008, but remained relatively stable until August 2011, when record heat pushed prices to \$3,000 per MWh for numerous intervals across multiple days. The Texas PUCT has raised the future cap to \$9,000, which may lead to even more volatility.

About Us:

TriEagle Energy is a Texas-based retail energy provider specializing in commercial and small industrial businesses. With innovative products, outstanding customer service, and competitive pricing, thousands of business customers have entrusted their power needs with TriEagle since 2003.
